 - ✓ Sales
 - Review of how skills are created.
- ✓ Actions you can take right after this session

Software use API to communicate

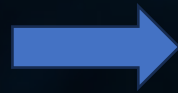

MCPs translate user request to API

“Get the
last email
from John”

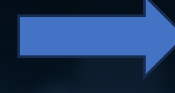

User

MCP
Server

```
1 # IMPORT
2 import json
3 import os
4 import requests
5
6 # INITIALIZE
7 apiToken = os.environ["NETBOX_APITOKEN"]
8 nbApiHeaders = {'Authorization': 'Token ' + apiToken}
9
10 nbBaseUrl = 'http://172.22.45.1/api'
11 nbApiUrl = '/dcim/regions/'
12 nbApiQuestion = nbBaseUrl + nbApiUrl
13
14 # MAIN
15 # Retrieve JSON blob from NetBox
16 nbApiResponse = requests.get(nbApiQuestion, headers=nbApiHeaders)
17 # Prettyprint the JSON blob
18 print(json.dumps(nbApiResponse.json(), indent=4))
```

Skills are textual instructions

- ✓ Provide rich context and detailed actions to take
- ✓ Real time execution of product launch. 4 hats
- ✓ You do not have to explicitly mention a connector (MCP)
- ✓ Let Claude create skill for you. Simply chat with it
- ✓ Write it all it to an MD file (Claude will do that for you)

It starts with a kickoff email

Team,

Today we got board approval to launch Pulse — Perion's new AI-powered attention measurement product

Pulse gives advertisers what they've never had: a single real-time score for how their creative is performing across CTV, DOOH, and retail media, all in one place...

Product ...

R&D ...

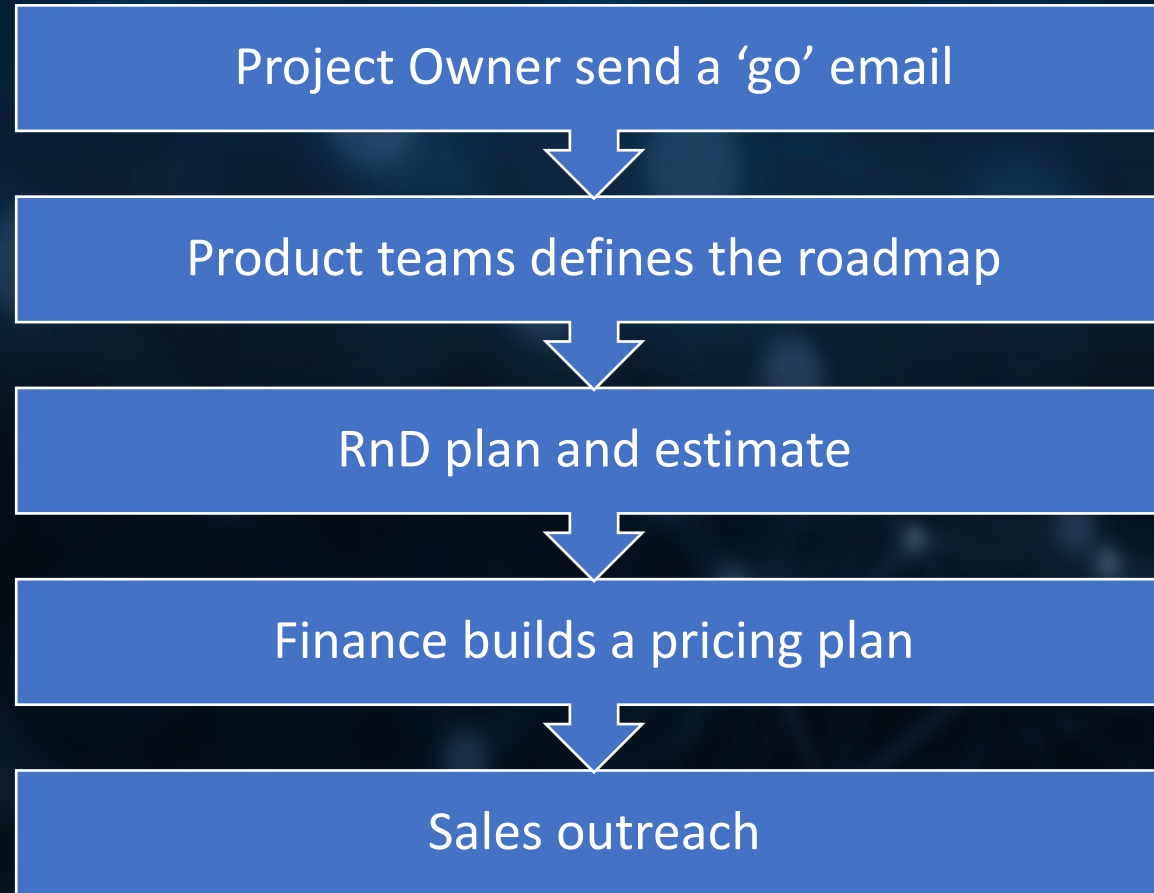

Finance ...

Sales ...

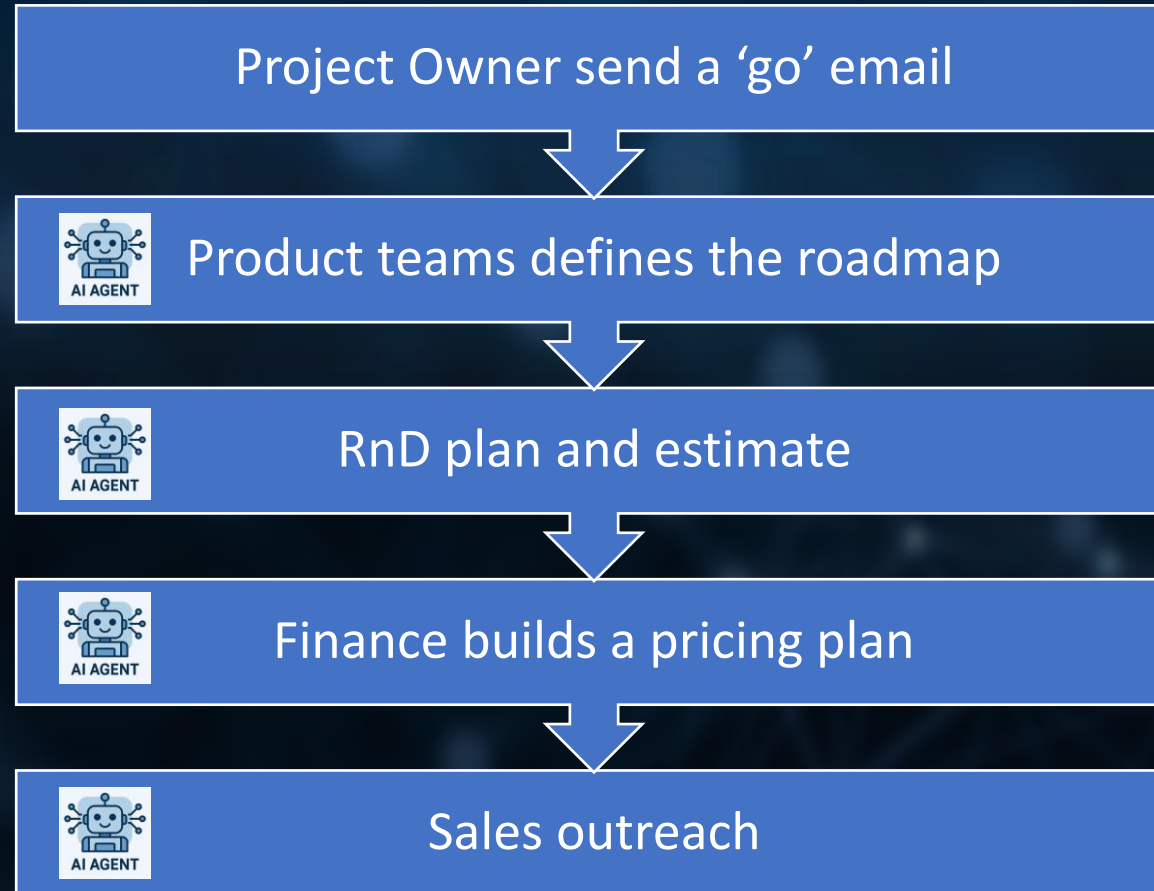

Let's build something the market hasn't seen.

Tal Jacobson
CEO, Perion Network

It starts with a kickoff email

Recap

- ✓ Focusing on Claude, Quick review of how to set up connectors
- ✓ Run a full agentic cycle for product launch
 - Product
 - RnD
 - Finance
 - Sales
- ✓ Created an example skill

Actions to take right after this session

- ✓ Identify parts of your role that can be described as 'recipes'
- ✓ Brainstorm with Claude. Create a skill file(s) that describes to steps to take
- ✓ Connect the required connectors
- ✓ Test it. Iterate. Improve
- ✓ Share your success stories with others
